

Project Assumptions Template

This deliverable contains assumptions regarding the scope and approach to be taken for a project. The assumptions should be used to review the estimate (cost and time) with management and as a basis for understanding when to reestimate. This deliverable is created as the Project Work Plan is tailored, and estimates are developed. Assumptions should continue to be documented throughout the development of the Project Plan; program management will review the assumptions during the Project Plan approval process.

IPT Phase

Identify the phase of the IPT process.

Assumption

Document the assumption regarding scope and approach to be taken for a project. The assumptions should be used to review the estimate with management and as a basis for understanding when to reestimate.
