

## **Report 1: IRB and Development Requests Mapping**

**This report provides a detailed list and descriptions of IRB and Development project requests. Each project request has been mapped to a recommended initiative from the Capability Release Plan (version 1.0). The report includes requests which were recommended as “Create Consolidated SFA Plan” and “Continue - Not yet Started” during the Quick Hit Recommendations review efforts. This report supports the information contained in Appendix C: Detailed Mapping of Initiatives in the Capability Release Plan.**

**While the mapping does not suggest that a project request would be satisfied by the initiative which it is mapped to, it does provide a reference to indicate the initiative that could possibly address the project’s requirements.**

## **Report 2: Business Requirements Mapping**

**This report provides a detailed list of business and performance requirements contained in the Customer Service Task Force Report, Performance Plan, and the Modernization Blueprint. These requirements are mapped to recommended initiatives identified in the Capability Release Plan (version 1.0). This report supports the information contained in Appendix C: Detailed Mapping of Initiatives in the Capability Release Plan.**

**While the mapping does not suggest that a requirement would be satisfied by the initiative which it is mapped to, it does provide a reference that indicates which initiative could possibly address the requirement.**

## **Report 3: Recommendations for IRB and Development Requests**

**This report provides detailed information on all IRB and Development project requests that were identified during the Quick Hit Recommendations review efforts. The report is organized by recommendations (i.e. “Cancel”, “Done”, etc.). The information in this report includes project descriptions, recommendations, comments, and funding request amounts where available.**
