

## Page Definition

A Page Definition represents the layout of a page. It provides the details of the page, such as its type, URL, and elements (e.g., widgets, links, text, graphics, etc.). Create this deliverable when designing a web-based interface and use as an input for page development to clarify how each page should look.

<b>I. IPT Name:</b>		
<b>II. Deliverable Name:</b> Page Definition		<b>Date Completed:</b>
<b>III. Contact Information</b>		
	Name	Channel Unit
IPT Sponsor		
Channel Task Manager		
CIO Task Manager		
Contractor Task Manager		
<b>IV. Task Order Number:</b>		

## Description

The **General** area of the sample documents configuration management and audit trail information concerning this document.

The **Summary** area of the sample documents the name, a short paragraph, and a list of keywords that describe the content of this document.

In the **Details** area:

**Page Type:** Type (either frameset or frame) of the page.

**Page URL:** Web-site address of the page.

**Page Template:** Name of the HTML file containing the template for the page.

**Link to CAR Diagram:** Reference to a deliverable document describing the widgets on the page, the possible actions on the widgets and the response to those actions. The linking functionality is supported by BI Designer.

In the **Sub-Components** area:

**Sub-component:** Name of an element on the page.

**Department of Education  
Student Financial Assistance**

**Sub-component Type:** Type (audio, video, text, image, script, applet, page widget, frame, etc.) of the element.

**Sub-component Location:** Position of the element on the page.

**Sub-component URL:** Address of an element.
