

```
#!/bin/ksh
#
# goInOp script
#
# Configure this script when using the high availability feature of
# Network Dispatcher and optionally when using Network Dispatcher in a
# standalone environment.
#
# This script is executed when the Network Dispatcher executor is stopped
# (and before the executor is initially started).
#
# This script must be placed in the /bin directory where Network Dispatcher
# is located (by default this is /opt/nd/dispatcher) and it needs to
# have root execute permission.
#
# le0=Ethernet, hme0=fast Ethernet
