Package gov.ed.fsa.eai.engine

Interface Summary

EAITransformEngine	The transform engine processes a single message.
------------------------------------	--

Class Summary

EAIProcessCommandMessages	Processes the "stop" and "refresh" engine commands.
EAIProcessInitQ	The main method of this class reads a message from a queue, invokes a method to process the message into a ArrayList of strings, then writes the ArrayList to another queue as a series of messages.
EAIProcessPerf	A placeholder class that does nothing.
EAIProcessQ	The base class for handling an input queue.
EAIProcessQFactory	Generate an instance of an EAIProcessQ implementation for a given EAI engine name.
EAIProcessQPerf	Process performance events.
EAIProcessQStandard	This class extends the abstract class EAIProcessQ, which in turn extends Thread.
EAITransformEngineTest	Trivial class to demonstrate the workings of the EAITransformEngine.

Exception Summary

EAIRollbackException	An exception that is thrown by the transformMessage method of the TransformMQ class or its extensions.
--------------------------------------	--
