## **1 Introduction**

The *Integrated Technical Architecture (ITA) Release 2.0 (R2.0) Requirements Traceability Matrix (RTM)* provides a list of requirements that Student Financial Assistance (SFA) application teams and ITA team members have identified as necessary to maintaining and enhancing SFA's ITA environment.

The RTM provides a way to gather all of the requirements that have been identified and attempt to prioritize them in order to create a list the ITA team may work towards completing. The ITA team will complete as many of the tasks identified in the RTM as possible given the timeframe, resources, and budget constraints. The ITA team will work towards completing as many of these tasks as possible, however, the ITA team and SFA will still need to agree to the specific tasks and priorities that will be included in ITA R2.0. Some tasks may be moved to future releases, while new tasks and priorities may be added to R2.0.

## **2 Requirements**

See the attached 46.1.2 ITA R2.0 Requirements Traceability Matrix v.10.xls document.
