- **Architecture**
- **Schedule**
- **Upcoming Plans**
- **Summary**

Summary of Key Requirements

- **Solution needs to be web-based**
- **High level of availability**
- **Must integrate well with FSA PIN**
- **Enhanced “Security” is needed**
- **Reusable solution**
- **Must integrate with FSA systems:**
 - **39 business applications**
 - **26 IDs/credentials**
 - **26 enrollment processes**
 - **Focus on CPS, NSLDS, COD, eCB and GAPS/FMS through the Schools Portal**

.... We Now Know What We Need

IPT Achievements

- **Provided an enterprise view**
- **Provided a single source document for FSA sign on requirements**
- **Provided potential options for solution approach**
- **Provided seamless transition to Phase II**
- **Completed Phase I on time and within budget**
- **Provided a forum for idea management – FSA channels are thinking along the same lines with respect to system access**

Scope

Phase I IPT Scope does not include:

- Authorization
- Enrollment
- Non-Repudiation
- Confidentiality

Modernization Architecture

Single Sign-On Provides the “User Gateway” to FSA Systems

Users, Systems and Credentials

Summary

What Does This Project Mean to the AWG?

- Opportunity for AWG to participate in the IPT to provide input and gain perspective
- Opportunity to help select an FSA solution and help define a standard for identification and authentication

What Does the IPT Want From the AWG?

- Participation and input as an “Advisor” in the selection and design phase so that a true *enterprise-wide* view can be achieved
- Provide suggestions to define technical standards for identification and authentication
