

Security and Privacy Team Success Overview

Task Overview

KPMG Consulting has worked with FSA's Security and Privacy Team since the Spring of 2000. During our association, we have developed numerous products, trained countless FSA employees, and advocated security and privacy to whomever would listen. Recently, the FSA CIO requested a briefing on the successes of the Security and Privacy team; not just KPMG Consulting, but also the FSA team members. In response, we gathered all previous deliverables, analyzed the affect those deliverables had on FSA, and created a briefing for the CIO. The briefing showed not only the work we have done, but also projected where we need to go in the future. The briefing in its entirety was never used, but the exercise was well worth the effort. We will use the findings from the briefing to establish a roadmap for future activities.
