1 Cohort Rate School Relationships Report

This design is composed of one report:

- Cohort Rate School Relationships Report (**Section 1.1**)

1.1 Cohort Rate School Relationships Report

1.1.1 Overview

Description	The Loan Profile Data by SSN Report identifies the school relationships (i.e., parent, underlying, and/or substitution) used when calculating a given cohort rate.
User Group	Department of Education – Default Management Division
Data Source	NSLDS II Data Mart
Output Media	Online Viewing, Exportable File
Frequency	On Request
Requirements Traceability	2.199
Comments	This report corresponds to an ad hoc NSLDS query that is run for the Default Management Division. Two alias tables will be used in the report to create the required self-join of the default rate history and organization tables. These alias tables will be referred to as “D2” and “O2” in this report design. In the result set, the first school code column is the parent school and the second school code column is the associated underlying or substitution school. The first column will repeat the school code if there is more than one underlying or substitution school.

1.1.2 Filter Specifications

Filter	Filter Description	Prompt	Default	Min/Max	Type
Choose COH Rate Type (D1)	This filter limits the result set by the cohort rate type selected by the user. This filter is applied to D1.	Yes	Z	Min = 1 Max = 1	Filter Definition Prompt – Qualify on Attribute
Choose COH Rate Sub Type (D1)	This filter limits the result set by the cohort rate subtype selected by the user. This filter is applied to D1.	Yes	P	Min = 1 Max = 1	Filter Definition Prompt – Qualify on Attribute

Filter	Filter Description	Prompt	Default	Min/Max	Type
Choose COH Valid Year (D1)	This filter limits the result set by the cohort year selected by the user. This filter is applied to D1.	Yes	Current Cohort Year (i.e., current year - 2 yrs.)	Min = 1 Max = 1	Filter Definition Prompt - Choose Attributes in Hierarchy
Choose COH Valid Year (D2)	This filter limits the result set by the cohort year selected by the user. This filter is applied to D2.	Yes	Current Cohort Year (i.e., current year - 2 yrs.)	Min = 1 Max = 1	Filter Definition Prompt - Choose Attributes in Hierarchy

1.1.3 Attribute Specifications

Attribute	NSLDS Table	NSLDS Attribute
School (<i>code</i>) - O1	ORG	SCH_CODE
COH Rate Sub Type - D1	DEF_RT_HIS	RT_SUB_TYPE
School (<i>code</i>) - O2	ORG	SCH_CODE
COH Rate Sub Type - D2	DEF_RT_HIS	RT_SUB_TYPE

1.1.4 Metric Specifications

No metrics identified for this report.

1.1.5 Hierarchies for Drilling

No drilling options identified for this report.
